Conclusions and Suggestions

The continuous shocking atrocities, persecutions, genocide and ethnic cleansing, unlawful displacement, torture, imprisonment, lack of democracy, corruption, violation of the sovereignty of the country, infringement of TPLF to the Amhara regions, looting and marginalisation of the majority of the Ethiopian people are great concerns not only for Ethiopia and its friends but also for all part of East Africa and beyond that for the stability of the whole continent.

It is also ridiculous to talk about development in figures when Millions are starving, tens of thousands are displaced and when genocide and ethnic cleansing are in progress.

Ethnic based racism and anarchy emerged as one of the present day's most dangerous inhuman thinking, which is damaging this wonderfully developing and integrating world. TPLF is an isolated minority ethnic group that cannot defend itself leave alone to be an ally against terrorists and therefore it does not give sense to use terrorism and business as an excuse of keeping relationship with this criminal group.

Abandoning TPLF and maintaining the good traditional relationship with the broad peace loving and glorious people of Ethiopia is the only reliable alliance that the international community can be benefited in all aspects. Ethiopians are keen to keep their good traditional relationship with the UK and ask the British Government to collaborate and participate in bringing the criminals to the International Criminal Court (ICC) for the crime they committed against humanity.
